Art Unit: 1624

DETAILED ACTION***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 are, drawn to compounds, compositions, process of making and methods of using compounds of formula (I).

Group II, claim(s) 7-31 are, drawn to methods of using compounds of structural formula (I).

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in Group I and II lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds of Group I clearly has different special technical features than the methods of Group II and neither substituents on formula (I) define a contribution over the prior art and thus, vary extensively and when taken as a whole result in vastly different compounds and compositions. Moreover, the uses recited in Group II do not define any contribution over the prior art.

Accordingly, unity of invention is considered lacking and a restriction of the invention in accordance with the rules of unity of invention is considered proper.

In addition to an election of one of the above groups, further restriction will be required in the following manner:

A. Where R_3 and R_4 together with the nitrogen atom to which they are attached form a

B. Where R is

Art Unit: 1624

In addition to the election of any of Groups I-II, an election of a single disclosed species is required for search purposes.

A telephone call was made to Edward Wilusz on 07/27/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.
